

Watersafe Compliance Management System (WCMS)

Key Features and Benefits

WCMS is an online Compliance Management system for ACoP L8 Control of Legionella, and provides an online **'L8 Compliance Overview'**, enabling the Responsible Person to fully understand the level of L8 compliance across a portfolio of buildings. It does this by automating elements of the L8 monitoring process and creating an interactive compliance network between Rentokil, Client Building managers and the Responsible Person, even when the monitoring is shared between Rentokil and the Client.

Area	Feature	Benefit
Compliance Reports		
Temperature Records	Temperature 'logbooks' for each building available on demand via secure website.	Always available with the latest monitoring information.
	Temperature 'logbooks' for each building emailed out monthly.	Automatic reminder to check compliance status.
Inspection Completion	Report indicating if L8 inspections were completed on time.	
Compliance Analysis	Graphical analysis of why Non-conformances are occurring, by asset type and monitoring task	Identifies common problems causing non-compliance at either building, site or client level
Monitoring Inspections		
Inspection Scheduling	Inspections automatically generated depending on specific assets in specific buildings.	Clear understanding of what needs to be done, by when and by whom.
Inspection Forms: distribution to PDAs	Inspections automatically sent to the relevant Rentokil Hygiene Technicians	Technicians know exactly what monitoring tasks need to be done, where and by when
Inspection Forms: distribution by email	Inspection sheet emailed as a PDF to local Building managers	Building managers know exactly what monitoring tasks they have to do on which specific asset and by when.
Inspection Status	Inspections listed by building, status ('Due this Month' or 'Overdue') and responsibility (Rentokil or Client's Building Managers)	Clear overview of inspection compliance status and who is responsible for each inspection.
Non-Conformances		
Remedial Tasks	Remedial Tasks listed by Client, building, Due Date, Status and Responsibility. PDF report can be printed from website.	Clear overview of Non-Conformance status, due date for action and who has responsibility for rectification.
Remedial Tasks Report	Outstanding Remedial tasks report emailed monthly	Automatic reminder to check Non-conformance status.
Remedial Task History	Rectified tasks listed by building and completion date	Clear audit trail of each Non-Conformance, how it was managed & rectified
Asset & Sources		
Asset History	View all temperature and other L8 task records for a specific tap, tank or Calorifier	Identify and manage 'problem' assets. Provide detailed asset history in the event of an outbreak.
Asset Analysis	View all sources and assets, by asset type for any level, from All buildings down to a single room	Provides an inventory of asset types across an entire building portfolio, e.g. the number of Tanks, Calorifiers or TMVs.
Document Management		
Risk Assessments	All Risk Assessments, Certificates and Schematics stored online in individual 'building' folders. Alerts can be emailed alerts if any changes are made	All the L8 related information in one place. Any changes to specific documents are notified to selected users. Access can be tailored to client needs.
